VERTICAL BAND SAWS

HYDMECH

VW-18

Photos may show optional equipment.

OPTIONAL POWER TILT

Allows the operator to enter a desired angle up to 60° in either direction and have the machine automatically move the head to that angle. This option features an upgraded control, as pictured below.

ADJUSTABLE CANTED HEAD

The machine is capable of cutting with the saw head at 90° or with a 3° cant. It minimizes chip load resulting in a more efficient, quicker cut and longer blade life.

Prices and specifications are subject to change without notice. Incoming freight and applicable rigging to offload will be additional charges. Sales tax, if applicable, to also be additional charge. ACC Machinery terms and conditions apply to all quotations and sales. Feel free to contact us with any questions: 602-258-7330. We value the opportunity to be your LOCAL Arizona focused full-service distributor of fabricating and metalworking equipment, tooling, parts and service. Thank you.

STANDARD FEATURES

- Adjustable 3° canted head
- Semi-automatic control
- Two full stroking hydraulic vises
- Manual precise head positioning from 60° left to 60° right
- Digital angle display w/ protractor
- Mechanically adjustable idler side guide arm
- On-demand hydraulics save energy
- 5 HP VFD. True direct blade drive
- Hydraulic positive down feed
- Cast iron band wheels
- Replaceable blade brush
- Robust steel base
- Easy access electrical panel and hydraulics
- Blade breakage switch
- Mechanical band tensioning with digital readout
- Replaceable carbide guide inserts
- 0.5 HP hydraulic pump provides system pressure

Machine shows optional power tilt

- Safety door interlocks
- Flood coolant with wash down hose
- Laser light and work light
- Variable vise pressure

OPTIONAL FEATURES

- Power tilt with programmable go to angle
- Chip bucket
- Hydraulic overhead bundling
- Mist lubrication
- Work stop
- Tall square vise inserts
- Power transformer
- Idler conveyors

Options can be formally quoted upon request.
Note: Some options cannot be added after machine is built.

STANDARD FEATURES

- Two full stroking hydraulic vises
- Select left or right side control panel
- Hydraulically powered idler side guide arm
- 7.5 HP VFD. True direct blade drive - no belts/pulleys
- Drag chain chip conveyor
- Hydraulic positive down feed
- Cast iron band wheels
- Replaceable blade brush
- Robust steel base
- Easy access electrical panel and hydraulics
- Blade breakage switch
- Hydraulic band tensioning with digital readout
- Replaceable carbide guide inserts
- 2 HP hydraulic pump provides system pressure

- Safety door interlocks
- Flood coolant with wash down hose
- Laser light and work light
- Variable vise pressure

OPTIONAL FEATURES

- Fixed 6° canted head
- Chip bucket
- Hydraulic overhead bundling
- Digital angle display
- Mist lubrication
- Non-driven pop-up lift roller
- Drag chain chip conveyor
- Tall square vise inserts
- Hydraulic chip conveyor
- Idler & powered conveyors

Options can be formally quoted upon request.

Note: Some options cannot be added after machine is built.

V-18

ROBUST RIGID CONSTRUCTION

The saw head carriage is guided on heavy duty linear rails ensuring rigid and precise head travel, resulting in an accurate and smooth cutting action. The machine base is designed and produced with electro-welded steel components for maximum rigidity and support. The V-18 features high quality cast iron hardened wheels with heavy-duty wheel and gearbox shaft bearings.

EASY ACCESS HYDRAULICS

A 2 HP hydraulic pump supplies system pressure which controls all vising, head swing, head advance/retract, guide arm movement and blade tension functions. Easy access for minimal downtime.

OPTIONAL TALL SQUARE VISE INSERTS

Good for clamping rounds that are larger than 12"*
Second vise is standard! Note: reduces width capacity by 1/2" and limits saw to 90°

Photos may show optional equipment.

V-18APC-60

AUTOMATIC MULTI-INDEXING

Shuttle features automatic multi-indexing up to 40" in a single stroke with automatic kerf compensation. V-18APC-60 can be built with a left or right side infeed at no additional charge.

HYDRAULIC POSITIVE DOWNFEED

The DDF system (dual down feed system) has the capability of controlling both feed rate and feed force parameters to achieve optimum cutting results, and blade life.

BLADE CHAMBER

This feature allows the operator to run the machine unattended without the possibility of the blade catching on the material as the head retracts. Without this feature blade can be damaged including blade guard, saw table, and guides.

Photos may show optional equipment.

STANDARD FEATURES

- You choose left or right side infeed
- Automatic programmable mitering with “go to” angle functionality from 60° left to 60° right
- Four full stroking hydraulic vises (feed, main, and outboard) and squaring vise
- 8.5” Mitsubishi FX5U PLC color touch screen controller. No flipping from screen-to-screen, the control is interactive with messages for the operator that reduces the learning curve. User Friendly Graphical Icon programming for miter cutting, 1000 jobs, 20 jobs in queue
- Automatic multi-indexing up to 40” in a single stroke
- Powered movable guide arm
- Hydraulic overhead bundling
- 7.5 HP VFD. True direct blade drive - no belts/pulleys
- Hydraulic DDF system
- Blade chamber separates material from cut part
- Out of stock switch
- Cast iron band wheels
- Replaceable blade brush
- Robust steel base
- Easy access electrical panel and hydraulics
- Blade breakage switch
- Drag chain chip conveyor
- Hydraulic band tensioning with digital readout
- Replaceable carbide guide inserts
- 2 HP hydraulic pump provides system pressure
- Safety door interlocks
- Flood coolant with wash down hose
- Laser light and work light
- Variable vise pressure
- 3 degree head cant

OPTIONAL FEATURES

- Chip bucket
- Mist lubrication
- Non-driven pop-up lift roller
- Tall square vise inserts
- Hydraulic chip conveyor
- Idler & powered conveyors

**Options can be formally quoted upon request.
Note: Some options cannot be added after machine is built.**

STANDARD FEATURES

- 4° canted head allows for efficient cutting and improved blade life
- Cast iron, torsion free saw head provides durability, stiffness, and absorbs vibrations
- On-demand hydraulics save energy
- High efficiency, constant torque electric ball screw feed system
- Automatic programmable mitering with “go to” angle functionality from 60° left to 60° right
- Semi-automatic touch screen NC controller
- Two full stroking hydraulic vises
- Electronic ball screw powered, guide arm
- 10 HP VFD. True direct blade drive - no belts/pulleys
- Cast iron band wheels
- Replaceable blade brush
- Robust steel base
- Variable vise pressure
- Easy access electrical panel and hydraulics

- Electric chip conveyor
- Blade breakage switch
- Electronic band tensioning provides consistent, automatic blade tension
- Replaceable carbide guide inserts
- 2 HP hydraulic pump provides system pressure
- Safety door interlocks
- Flood coolant with wash down hose
- Laser light
- Work light
- Mist lubrication

OPTIONAL FEATURES

- Hydraulic overhead bundling
- Tall square vise inserts
- Remote console
- Chip bucket with pump
- Idler conveyors
- Powered conveyors

Options can be formally quoted upon request.

Note: Some options cannot be added after machine is built.

V-20

WINDOWS TOUCH SCREEN CONTROLLER

Operates the automatic cycle but allows for manual operation as well. A variety of languages can be chosen for message screen display.

OPTIONAL OVERHEAD BUNDLING

A hydraulically powered overhead clamp moves down on the material. This option is very effective, and necessary for bundle cutting various material shapes and sizes.

EASY ACCESS ELECTRICAL PANEL

The electrical components are housed in a compartment on the front of the machine. Components are neatly laid out and labeled for easy troubleshooting.

Photos may show optional equipment.

V-25

10 HP DIRECT BLADE DRIVE

Heavy-duty 2-stage gearbox and motor is controlled by an AC inverter drive. Blade speed is easily adjusted with a wide range of band speeds. Less moving parts compared to belt and pulley drive machines.

OPTIONAL MIST LUBRICATION

An alternative to the standard flood coolant system, mist lubrication is an air mist system providing blade lubrication and cooling. No recovery is required as the mist evaporates.

STANDARD FEATURES

- 6° canted head allows for efficient cutting and improved blade life
- 8.5" Mitsubishi FX5U PLC color touch screen controller. No flipping from screen-to-screen, the control is interactive with messages for the operator that reduces the learning curve. User Friendly Graphical Icon programming for miter cutting, 1000 jobs, 20 jobs in queue
- Control provides hydraulic powered mitering from 60° left to 60° right
- Digital angle display
- Two full stroking hydraulic vises
- Hydraulically powered guide arm attached to saw column. In automatic mode, programmable guide arm adjusts to material height when mitering, providing optimum blade support and minimum blade exposure.
- 10 HP VFD. True direct blade drive - no belts/pulleys
- Cast iron band wheels
- Replaceable blade brush
- Robust steel base
- Easy access electrical panel and hydraulics
- Blade breakage switch

- Hydraulic band tensioning with digital readout
- Replaceable carbide guide inserts
- 3 HP hydraulic pump provides system pressure
- Safety door interlocks
- Flood coolant with wash down hose
- Laser light
- Work light
- Variable vise pressure

OPTIONAL FEATURES

- Chip bucket with pump
- Hydraulic overhead bundling
- Mist lubrication
- Pop-up feed roller
- Tall square vise inserts
- Hydraulic chip conveyor
- Datum line vertical rollers
- Bridge/interface bracket
- Powered bridge/interface bracket
- Idler conveyors
- Powered conveyors

STANDARD FEATURES

- 6° canted head allows for efficient cutting and improved blade life
- 60" bar feed, left side
- Shuttle features automatic multi-indexing up to 60" (120" optional) in a single stroke with automatic kerf compensation. Powered by a rack and pinion servo drive.
- Automatic programmable mitering with "go to" angle functionality from 60° left to 60° right
- Hydraulic head tilt
- Cast iron band wheels
- 8.5" Mitsubishi FX5U PLC color touch screen controller. No flipping from screen-to-screen, the control is interactive with messages for the operator that reduces the learning curve. Programmable up to 1000 jobs with 20 in queue.
- Two full stroking hydraulic vises
- Hydraulically powered, programmable guide arm attached to saw column
- 10 HP VFD. True direct blade drive
- Blade chamber separates material from cut part
- Hydraulic chip conveyor efficiently removes chip from saw
- Replaceable blade brush
- Robust steel base

- Out of stock switch
- Blade breakage switch
- Easy access electrical and hydraulics
- Pop-up feed roller
- Hydraulic band tensioning with digital readout
- Replaceable carbide guide inserts
- 3 HP hydraulic pump provides system pressure
- Safety door interlocks
- Flood coolant with wash down hose
- Laser light & work light
- Variable vise pressure

OPTIONAL FEATURES

- Chip bucket with pump
- Hydraulic overhead bundling
- Mist lubrication
- Tall square vise inserts
- Out feed vise
- Right side infeed shuttle
- 10' shuttle infeed
- Bridge/interface bracket (powered and unpowered)
- Idler & powered conveyors

Options can be formally quoted upon request.

Note: Some options cannot be added after machine is built.

V-25APC

PROGRAMMABLE GUIDE ARM

Hydraulically powered moveable guide arm attached to saw column. In automatic mode, programmable guide arm adjusts to material height when mitering, providing optimum blade support and minimum blade exposure.

60" BAR FEED

Fast shuttle vise is capable of indexing up to 60" (120" optional) in a single stroke. Shuttle carriage moves on linear rails and is driven by rack & pinion mounted gear reducer/servo motor assembly.

Photos may show optional equipment.

DANGER
Laser radiation from this product may cause eye injury.
Do not look directly into the beam or reflect the beam off any surface.

WARNING
Pinch point
Keep hands clear
during operation.
