- Variable vise pressure

OPTIONAL FEATURES to consider adding

- Full capacity hydraulic overhead bundling
- Work stop - 34"
- Single phase
- Remote operator console
- Mist lubrication
- Left hand side control panel
- Idler conveyors

S-20P

LASER LIGHT

This standard feature is ideal when manually marking your cut line and aligning that mark with the blade.

The laser light allows you to avoid jogging the blade downward while moving the part in and out.

A great safety feature as the head stays up in a locked position. An on/off switch is provided.

FULL CAPACITY HYDRAULIC VISE

Save time with the full capacity, full stroking hydraulic vise. Add the optional overhead clamp, which clamps material from above. This option is very effective, and necessary for bundle cutting various material shapes.

SEMI-AUTOMATIC CONTROLLER

Equipped with a digital LCD display, control shows machine mode, pieces cut, blade speed, blade tension, amperage draw, cut duration, overall machine run time, and head position.
